MISCELLANEOUS STOCKS

ments favorable to the companies. The August net earnings of the company showing an increase in the month of nearly \$200,000. New-York Central's statement for the quarter which ends September 30 was made public to-day-September earnings partly estimated-and the results given are most satisfactory. They were reflected in an advance in Central stock of over 1 per cent. The anthracite coal shares were higher, on rumors of the trade on a basis satisfactory to all the various interests, and outside of the Industrial shares Reading stock was the most extensively dealt in of any share on the list. The Industrials were again the leaders in point of activity, and sales in Distilling and Cattle Feeding amounted to over 52,000 shares, and the stock was sold down on a report that the people who are supposed to be at work harmonizing all parties interested in the company had run against a snag. Sugar Re-fining did not advance much on the decision of the Stock Exchange Governing Committee not to the company had run against a snag. Sugar Actining did not advance much on the decision of the Stock Exchange Governing Committee not to demand a statement from the trust at present, but the surface speculators and inside manipulators of Sugar stock were evidently well pleased. For their interests, a statement of the company's condition is best kept back. Legitimate investors were disappointed, but they are willing to believe that the Stock Exchange will at another meeting decide to compel the Sugar Trust to open its books for inspection. It is about three years since the stockholders of Sugar Refining have received a statement of the company's condition, and even though its stock is in the unlisted department of the Exchange, there seems enough reason to make it subject to the rules which are applied to other Industrial stocks which enjoy the distinction of being listed. The activity in the grain and cotton markets to-day was sufficient to overshadow trading in stocks. Sterling exchange was again weaker, and while the expectation of gold shipments on a special order for Germany prevented the market from advancing, the weakness in the exchange market helped to keep it from declining, and the result of the day's transactions was generally only fractional changes either way. The rates in the foreign exchange market are now below the gold export point, or the point at which there is a profit, and the present condition of the market points toward further case. The gold reserve is now only a trific above \$94,000,000, but this is not worrying the supporters of the present Administration, for they point with pride to the income account of the Government which is now receiving from Mr. Wilson's tariff act revenue sufficient to meet the bookkeeping expenses of the Government. To-day's receipts give the Treasury an excess of receipts over expenditures for the month of over \$100,000.

The following table shows final prices of the principal active stocks, compared with yesterday's last quotations:
